A passionate designer-turned-coder aspiring to bridge the gap between form and function.

Competencies

Design

- Illustrator
- Photoshop
- Sketch
- Figma

Development

- HTML/CSS/JS
- VueJS
- WordPress
- Shopify

Project Management

- Jira
- Trello
- Confluence

Experience

L3 Harris Technologies (March 2021 - Present)

Scrum master, software engineer, tester, and trainer.

Initially employed as a software engineer to work on state of the art communications systems; I was also able to utilise my skills as a software tester which required NV1 clearance. As time went on, I assisted with onboarding new employees and eventually took on the role of scrum master to a team of eight people. I also recorded training videos and edited manuals for the client on how to use our product, ensuring each one met contractual requirements.

I volunteered on the We3 Team to promote equality in the workplace. We ran workshops, talks, and events that aimed at supporting women in engineering which then eventually expanded to be more inclusive of all peoples in the workplace.

LitePages (March 2020 - February 2021)

Front-End Software Engineer

Responsible for building & maintaining the front-end for a customer-facing HR & advertising platform, including porting the project to the Vue JS framework, and actively collaborating with the in-house UI/UX team for feature development.

Danitt Pty Ltd (2016 - 2020)

Project Manager, Graphic and UI/UX Designer, Customer Relations / Social Media Management, and Software Testing

Initially operated in a project management and customer relationship capacity, but over time I expanded my skill-set to design and feature testing to accommodate our increasing client base. As my curiosity grew, I started building and testing some of those features myself, leading me to maintaining WordPress sites and building my own projects.

High School Teacher (2012 - 2016)

Art, English, Dance, Drama, Technology, Maths, Science, History, and various one-off subjects

Formally trained in English and Drama, I have taught various subjects in a variety of schools in both Australia and the United Kingdom. Alongside regular classroom duties, a typical workload included designing lesson plans, assignments, units of work, managing students with special needs, school excursions, fundraising, musical productions, staff training and evaluations, assisting with extra-curricular activities, and playground supervision.

Ride It Right Motorcycling Techniques (2005 - 2012)

Administrative Clerk

General office administration; managing stock, data entry, reception, invoicing and customer support.

Formal Education

2022 - Introduction to Python

- Scrum Master Course with Udemy
- First Aid Certificate with St John's Ambulance
- Enrolled Full Stack Developer Bootcamp with Coder Academy

2021 - Level 2 Polish with Brisbane Polish School

2020 - Modern JavaScript from the Beginning - Udemy

- Introduction to JavaScript - Code Academy
- Level 1 Polish with Brisbane Polish School
- Solo Learn: HTML and CSS Fundamentals
- Solo Learn: JavaScript Tutorial

2019 - Diploma of Design at Griffith University

2017 - IT Workshops in Warsaw, Poland:

- "How to Build your own WordPress Website"
- "How to build an ECommerce Website"
- "Website Hosting & Servers"

2012 - Bachelor of Teaching/Bachelor of Arts (Secondary) at The University of Newcastle
